CITECFEMTON SECURITY

Expertise with Passion.

crtec

CLOUD SERVICE

The preferred method of deploying CitecFemton is as a cloud-based Software-as-a-Service (SaaS) solution. The solution is hosted in the cloud by external certified data providers.

The data providers are compliant with information security standard ISO/IEC 27001:2013.

The data is stored on servers in Finland.

BACKUP SCHEME

- Daily incremental backups
- Weekly full backup

The backup scheme allows you to roll back to:

- Any day of the current week.
- The first day of any week of the current month.
- The first day of any month of the past 12 months.

CONNECTION SECURITY

CitecFemton uses encrypted connections throughout.

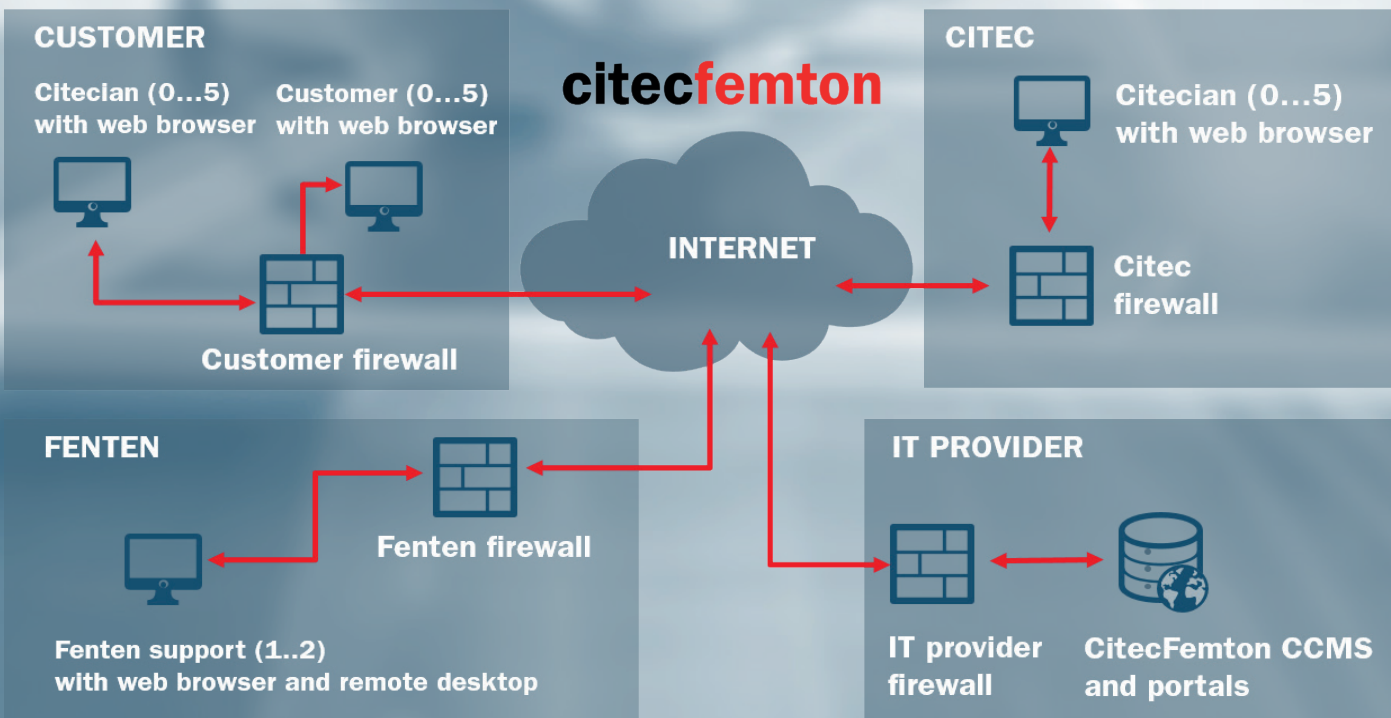

- Secure HTTP (HTTPS over TLS 1.2) with 128-bit encryption.
- Certificates issued by renowned certificate authorities.

CLIENT SOFTWARE

The customer only needs to have a supported web browser installed:

- Chrome
- Mozilla Firefox
- Internet Explorer 11
- Edge browser (Win 10)

CITECFEMTON ARCHITECTURE

AUTHENTICATION

Users log in by means of a user name and password. CitecFemton does not support single-sign on (SSO).

All passwords are hashed and salted before storing in the database.

CUSTOMER PREMISES

If necessary, a hybrid deployment model can be used at customer premises. CitecFemton CCMS is installed locally whereas the portals are available in the cloud.
